Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance: The claimed invention is directed to processing aids having greater than 75% by weight of vinylidene fluoride. The patent to Duchesne et al. US 5,015,693 is considered the closest prior art. This patent suggests polymers having less than 70.7% by weight. There is no suggestion or motivation in the art to use greater amounts of vinylidene fluoride. Applicants specification provides comparative data which would rebut any prima facie case of obviousness advanced.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
